

## **REPLICATION ACTIVITY**

### **Expression of interest to act as replicator for the project DESERT-ADAPT LIFE16 CCA/IT/000011**

I/We hereby express my interest in the topics of the project Desert-Adapt. I/We believe that the principles of the Desert-Adapt MANIFESTO are of great value for the promotion of more sustainable ways to manage the land, and we endorse such principles.

In light of this, we would be interested in being part of the replication activities envisioned by the project by creating our land management plan (Desertification Adaptation Model DAM) and being informed and included (on a volunteer basis) in any relevant Replication initiative of the project.
